

CHARGE READY HOME TOOLKIT

Your guide to helping customers understand and participate in SCE Charge Ready Home program

This Toolkit helps you with your outreach to SCE customers to encourage their participation in SCE's Charge Ready Home program. The program enables qualifying customers to upgrade their home electrical panel capacity to support a Level 2 charger. It is available to SCE customers who reside in qualifying low-income and disadvantaged communities (DACs).

Key points for Your Customers

- The Charge Ready Home program is available to qualifying SCE residential customers living in a single-family home
- There are two levels of rebates:

1

Up to \$4,200

Rebate for low-income households or enrollees in at least one qualifying public assistance program

2

Up to \$2,100

Rebate for qualified households in disadvantaged communities

This rebate helps customers upgrade to a Level 2 (L2) EV charger within 180 days of getting their EV.

Benefits of Upgrading for Your Customers

- Increased energy efficiency and potential energy cost savings
- Reduced risks of electrical fires or malfunction of an old panel
- Added capacity for electric devices, appliances or room additions
- Enhanced property value
